Microsoft Dynamics GP 10.0

EMPOWER YOUR PEOPLE WITH A COMPLETE BUSINESS MANAGEMENT SOLUTION

Give your people the tools they need to succeed with Microsoft Dynamics™ GP, a complete and scalable business management solution that helps growing and midsized organizations get up and running quickly while maximizing productivity. Robust financial and operational functionality delivers enhanced business intelligence, reporting, budgeting, and forecasting, so you can be confident that your solution will adapt to the changing needs of your business. With Microsoft Dynamics GP 10.0, you can:

- Improve productivity with RoleTailored access to easy-to-use tools in a familiar environment.
- Maximize efficiency and adapt to changing conditions with flexible workflow automation.
- Leverage powerful business intelligence tools to gain insight into all areas of your business.
- Tap advanced search capabilities to access all types of data quickly and easily.
- Maximize and extend IT investments with technologies optimized for the Microsoft platform.

BENEFITS

BOOST PRODUCTIVITY WITH EASY-TO-USE TOOLS
Streamline business processes and maximize productivity by enabling your people to perform role-specific tasks more easily in the familiar Microsoft® Office environment.

IMPROVE WORKFLOW
Maximize efficiency and manage response to changing conditions with flexible, straightforward workflow automation for business processes.

GAIN CRITICAL BUSINESS INSIGHT
Use enhanced business intelligence capabilities to help people across your organization to access, analyze, and update data on every aspect of your business using Microsoft Office SharePoint® Server 2007.

ADVANCED SEARCH CAPABILITIES
Search and locate structured and unstructured business information for a more complete view and efficient use of relevant data, documents, spreadsheets, and e-mail messages.

MAXIMIZE EXISTING TECHNOLOGY INVESTMENTS
Lower your total cost of ownership with a solution that is optimized for the Microsoft platform and tightly integrates with Microsoft Office system applications and other Microsoft products and technologies, and extend your solution using industry-specific offerings from a vast network of ISVs.

Microsoft Dynamics™

MICROSOFT DYNAMICS GP 10.0 ENHANCEMENT OVERVIEW

IMPROVED PAYABLES PROCESSES
Save time and improve accuracy with the ability to adjust vendor-specific 1099 tax types and box numbers; print in multiple boxes on a single 1099 form; and print multiple 1099s based on tax type. Take advantage of new Electronic Funds Transfer (EFT) output options, such as optional pre-notes, printing non-negotiable checks for EFT payments, validation for transit numbers, and support for corporate payments.

PAYROLL REQUIREMENTS MANAGEMENT
Quickly calculate and make retroactive adjustments to employee earnings for supplemental wages, and monitor garnishment across different states and jurisdictions. Manage complex deduction priorities and help ensure compliance with the ability to sequence tax-sheltered and garnishment deductions.

STREAMLINED PURCHASE ORDER PROCESSING
Simplify purchase ordering processing with automated, role-tailored approval routings. Take advantage of returns management improvements, such as password protection on deleting Returns Management Authorizations and the ability to use expired lots when entering purchasing returns.

TIGHTER DISTRIBUTION CONTROL
Maintain control over distribution by using Two-Step Transfers to track inventory in transit between warehouses. Flexible lot expiration capabilities alert you when a lot is nearing its expiration date so you can consume the lot, extend the expiration dates, or edit the lot's attributes.

ENHANCED PRODUCTIVITY WITH THE ACTION PANE
Help your people get more done with the Action Pane, a graphical, role-tailored command bar that appears across all navigation lists. Inspired by the Ribbon in the 2007 Microsoft Office system, the Action Pane enables you to preview and filter details for lists and then perform actions against multiple selected records—without the need to open and juggle new windows.

IMPROVED AGILITY FOR PLANNING AND PRODUCTION MANAGEMENT
Gain control over your shop floor with the ability to reverse manufacturing order receipts after posting. A new multi-level pegging tree makes it easy to trace material needs, sources of supply, and new demand generation.

SIMPLIFIED INSTALLATION
Deploy your solution easily with prompts and prerequisite checkers for Microsoft Dynamics GP, Microsoft Business Portal, and Microsoft Windows® SharePoint Services. Enhancements make it easy to synchronize security across Microsoft Dynamics GP, Web Services for Microsoft Dynamics GP, and Business Portal.

IMPROVED SEARCHING AND INFORMATION SHARING
Use Office SharePoint Server 2007 to find, use, and share the right information. Define and initiate searches that quickly return structured and unstructured information, including Microsoft Office Word documents, Microsoft Office Excel® spreadsheets, and Microsoft Office Outlook® e-mail messages.

STRATEGIC DECISION-MAKING
Gain meaningful business insight by taking advantage of standard reporting tools with refreshable Excel reports based on more than 200 SmartList favorites and more than 75 Microsoft SQL Server™ Reporting Services reports. The Report List helps you quickly find the reports you need, and the Report Libraries in Office SharePoint Server 2007 simplify storing, launching, and viewing reports.

AUTOMATED NOTIFICATIONS AND APPROVALS
Deploy Microsoft Dynamics GP with Office SharePoint Server 2007 for a role-tailored, customizable workflow that empowers your people to collaborate systematically on tasks and includes a full audit trail to help ensure accountability.
